Military Critical Technical Data Agreement (DD Form 2345)

If your company is required to maintain an active DD Form 2345, United States (U.S.)/Canada Joint Certification Program (JCP) certification establishes the eligibility of a U.S. or Canadian contractor to receive technical data governed, in the U.S., by Department of Defense (DOD) Directive 5230.25 and, in Canada, by the Technical Data Control Regulations (TDCR). Certification is required for U.S. or Canadian contractors who wish to obtain access to unclassified technical data disclosing militarily critical technology with military or space application that is under the control of, or in the possession of, the U.S. Department of Defense (DOD) or the Canadian Department of National Defense (DND). In order to obtain a certification, contractors must submit a DD Form 2345 to the U.S./Canada Joint Certification Office, along with supporting company documentation.

Please visit the DLA website at <https://www.dla.mil/HQ/LogisticsOperations/Services/JCP/> for more information regarding the DD Form 2345 process, including a link to the form itself as well as instructions and FAQs.

According to the JCP's website, the processing time for the DD Form 2345 application fluctuates depending on delivery method to their office and the volume of applications received. If there are problems with the application, e.g. incomplete or incorrect content, delays will occur. The website includes tips for avoiding these mistakes. Recent experience indicates a range of several weeks and as long as 2-3 months if the form contains errors. To shorten the approval time, it is recommended that you email the form to JCP-Admin@dlamail.mil and email that address frequently for status.
